In John's new book, Wealth Without Stocks or Mutual Funds, he outlines how to turn the tables on the banks and use your own money to scale and grow. If you are looking to scale your already successful business and capital is required (without giving up ownership to investors) this book is a must to study as a financial option. *I was blown away with what you shared – you delivered exactly what you promised, and more. Your ideas and concepts are indeed totally different that I had ever heard before, and made a lot of sense.*

*Your professional presentation and adept speaking style was informative, energetic and kept the attention of the group. Since your seminar, I have had a number of our team come to me to let me know that they had felt similarly, and that they would be contacting you to obtain more information and to move forward with what you proposed.*

*Great job on educating our team with what seems to be a great way to build wealth, with a twist! Bravo."*

## **What Clients and Students had to say about John and his trainings.....**

*"In the last two years I have sat down with several financial advisers and listened to them explain what products that they thought would suit my needs best. I am not a risk taker; I am a widow, a single mom and a business woman who was looking for a product that would build wealth for my retirement as well as for my children without having the risk of possibly losing it all. The first time I met John I knew he was going to be the guy to understand what I wanted and to help me achieve that goal! John has taken all of my fears out of how to invest my monies. With John's guidance I know I have set up a fantastic retirement for myself as well as a great nest egg for my family generations to come!"*

---Kim Z., Michigan

*"I first met John during a real estate training seminar back in November 2010. I was very impressed with John's knowledge of all aspects of real estate, but the concept of Perpetual Financing peaked my interest. I've been investing in stocks, all types of options, commodities and currencies for more than fifteen years and I had never heard of the concept of Perpetual Financing. My wife and I are currently using the funds in our whole life insurance policies to purchase four homes in Detroit this year at a discount from the peak market of 80% and renting them with a positive cash flow per month of \$550.00. By pulling the funds from the policies we continue to get the dividend on the total policy balance, plus the rental cash flow, plus the interest for the using the funds goes directly back to our policies. Finally, all the earnings within the policy grow tax-free.*

*John and his team simplified and automated the entire transaction process. From setting up the whole life insurance policy, finding high quality properties in Detroit at great discounts, closing, taxes, insurance, renting to high quality tenants and property management.*

*Finally, we plan to hold onto the properties for three to five years with the monthly positive cash flow and eventually sell the properties at an estimated 100% return, or more on our funds. John and his team will also handle the selling of the properties once the time is right. A complete end-to-end solution."*

---Jay H., Washington

*"I just spent three remarkable days with John Jamieson who was the main lecturer for a seminar in Los Angeles. He is a natural teacher, experienced investor and for me the whole package... John has hit the top of my Guru Chart... I recommend to all those investors who have been looking like geniuses because of a strong local economy it's time to listen and get some real methods and ideas from John Jamieson who knows how to make money in a challenged market."*

---Candice J., California

*"Mr. Jamieson was recently facilitating a training class in real estate. His knowledge, experience, and communication skills really helped open my eyes and perception into new ideas, concepts and strategies into the Real Estate Market. Mr. Jamieson's methods and strategies are tested proven and allotted economic gains for himself and his business. I highly commend his support, expertise, and facilitating techniques in the area of investing settings."*

---Semi P. S., Washington

*"As a national professional speaker, I always thought I was an outside the box thinker when it came to marketing my business dealings. What a treat and literal paradigm shift when John and I had the chance to work together. I was coached by the master himself!"*

---Dennis Dinoia, National Trainer, Florida

*"We first thank you for all your help with our first home. Besides being a great instructor in which you taught us a lot. You were great at answering our questions about this whole process... We followed your advice and got a toll free number and put the house on our website (that was so easy). We had our first open house on a Sunday. We had an offer four days later and closed on the property in two weeks. Our profit was \$25,000."*

---Jacqui and Chris H., Michigan

*"Excellent Training! So much information that is not available anywhere else. John and the instructors he invited know their subject matter inside and out. They are honest trustworthy folks with a sense of humor!"*

---Reggie W., Louisiana

*"This seminar was amazing. I wish you had been doing this 20 years ago and I had found you then. Thanks, I can't wait to get started with you."*

---Colin M., Connecticut

---Tom M., Michigan

## **What Medical Professionals are saying.....**

*"I would highly recommend "The Perpetual Wealth System" to anyone. My father has always been a huge proponent of whole life insurance. After reading John Jamieson's book, I realized how powerful owning a "properly designed" whole life policy can be. The Perpetual Wealth System explains the benefits of owning a whole life policy such as tax deferred growth, death benefits, long term care benefits if necessary, etc... The book then explains how to utilize the policy to essentially create your own bank from which you can take loans against. Mr. Jamieson also goes into various strategies to use that bank to grow your wealth. The book was a very easy read and a huge eye opener for me. I have had the opportunity to speak with John twice since reading his book and will say that his communication skills and candor are impeccable. I hope to be working with John for many years to come. There is absolutely no excuse to not read this book."*

---Dr. William Soscia, Florida

*"John is a knowledgeable, trustworthy, and helpful financial wizard. His depth of knowledge on the financial products and how they coexist with the current financial markets is a true asset. After discovering John, speaking and working with him, I now have a much more predictable and promising future. As a small business owner, I wish I found John sooner in order to become my own bank to self-finance business capital that I need. Because of John, I now have the financial plan to sustain my needs now, my retirement years and beyond. I highly recommend anyone to work with John if they are serious about a secure future."*

---Dr. Taj Haynes, North Carolina

*"I happened upon John at an ideal time in my career. My private practice was growing and my investments had increased markedly since the stock market crash of 2008. I was searching for a strategy to deleverage my market exposure without decreasing my return on investment. I took a chance and contacted John after viewing some of his on-line tutorials and reading his book "The Perpetual Wealth System." His knack for simplifying complex investment strategies and his willingness to openly discuss not only his greatest achievements as an investor, but also his failures and how he learned and improved as a result of them, immediately earned my respect. There are plenty of financial "experts" who can pitch an investment strategy without ever having waked the walk. John is a true and tried investor which makes for an ideal advisor and mentor. He listened to my concerns and suggested an approach involving real estate and whole life insurance. I now own four investment properties and an insurance policy that are both sources of guaranteed income regardless of how the stock market performs. The cash on cash return on my investment has already exceeded what I imagined, and the whole process from concept to implementation was seamless. I would recommend John and his team to anyone and look forward to doing business with him for years to come."*
