

As Fiscal Administration Manager for the **El Dorado County, California, Environmental Management Department**, my responsibilities include coordinating department-wide programs. A few months ago I had the pleasure of hearing Ms. Cheewa James deliver the keynote speech at a conference for government accountants. I wanted to hear more from this fascinating woman.

I arranged to have Ms. James conduct her presentation for our staff. Her presentation was innovative, entertaining, informative, and inspirational! The positive feedback I received from the employees was tremendous. Several long-time employees said this was the best presentation they've ever had. Others were discussing how they have implemented her thoughts and found they really work.

It is difficult to find someone who can present to all levels simultaneously, from line staff to top management. Ms. James did this quite successfully. I wholeheartedly recommend Cheewa James to any organization that is looking for a dynamic speaker who can bring innovative ideas to its employees.
