# DESIGN IN DETAIL

by KIM SCHROEDER B.I.D.

**PROBLEM** Ensuite Bathroom is too small, cramped, dark and drab.

**SOLUTION** By putting a small addition onto the house - 13' x 7', we used half of this space to enlarge this ensuite bathroom to create a light, fresh and airy space.

AFTER

- 1 The bulkhead ceiling design evolved into this creation from the necessity to install a beam where the old wall was removed. Additional bulkheads were created to add interest on the ceiling and the 3 bulkheads line up with the tile details surrounding the mirrors. The middle bulkhead encases the structural beam.
- 2 The colour scheme was inspired by the small mosaic tiles in soft cream, caramel and butter yellow tones.
- 3 Hanging pendants not only add light but sparkle and glitz.

- 4 Potlights in the bulkheads ensure sufficient light for shaving and make-up application.
- 5 The his & hers metallic copper glass sinks add a pop of a mid colour tone.
- 6 The custom curved vanity is painted in a soft cream tone to maintain the light, fresh feel. The under cabinet lighting and the floating design give the illusion of more width to the room.
- 7 Centiva vinyl floor tiles were chosen for its pearlescent finish and warmth underfoot.

- 8 A floating tub was used to keep an open, spa-like feeling.
- 9 The deck mounted faucets rather than floor mounted faucets, are a more cost effective solution.
- 10 The wall to wall sheers add soft contrast to all the hard materials, as well as filter the light. A top down/bottom up blind provides the privacy needed.
- 11 A chandelier above the tub adds more sparkle to the space.
