

Luke Skywalker Saves the Planet of Jakku

Luke Skywalker needs some lightsabers to help save the planet of Jakku.

Josh, Jack, and BB8 want to help Luke Skywalker.

There are 6 lightsabers behind the secret wall .

Roll the dice to find out how many lightsabers that they take to Luke Skywalker to save the planet of Jakku.

- Record what happens: $6 - 2$ makes 4 lightsabers left behind the wall.
- Prove it! $6 - 2 = 4$ because $4 + 2 = 6$
