

## Patient Safety Indicators

All Ontario hospitals are required to report pertinent patient safety indicators. Our facility monitors and reports the following three indicators on our website each month:

- *Clostridium difficile* rates
- MRSA bacteremia rates
- VRE bacteremia rates

During the calendar year for 2011 our hospital accumulated the following data:

	<b>Number of new cases</b>	<b>Rate</b>
<b>Clostridium difficile Public Reporting</b>	< 5	0.0 / 1000 patient days
<b>MRSA / VRE Public Reporting</b>	< 5	0.0 / 1000 patient days
