Subject: Letter of Recommendation

Theco Electric
PO Box 2290
Corrales, NM 87048

To Whom It May Concern:

I am pleased to offer this letter of recommendation on behalf of Theco Electric. Theco Electric has successfully completed the FY13 SOF AC-130J Apron & FUT project at Cannon Air Force Base, NM. Theco Electric provided complete electrical systems, communication systems and fire alarm systems for the referenced project.

Theco Electric provided project management and supervision for the project who were conscientious, responsible and cooperative. They provided high quality workmanship as well as demonstrated the ability to solve problems with a solution oriented attitude when faced with challenges and issues on the project.

Theco Electric's support staff is very well organized and task oriented. Paperwork was submitted timely and complete, minimizing the possibility of delays to the project.

In conclusion, I would not hesitate in referring this company to work on any project and I intend to use Theco Electric on future projects with Okland Construction Co. Inc

Respectfully,

Greg Holland
