

January 18, 2018

Columbia River Fire and Rescue would like to provide the following information to assist in determining your fire protection classification or rating for insurance purposes.

Public Protection Classification by ISO (Insurance Services Office, Inc)

Effective March 1, 2018: ISO* has provided new protection classification for Columbia River Fire and Rescue. The resulting classifications are either **Class 4 or 10.**

- **Class 4** applies to properties within 5-road miles of a recognized fire station.
- **Class 10** applies to properties over 5 road miles of a recognized fire station.
- The fire insurance rating (ISO rating) is one of the factors used by insurance companies to determine property insurance premiums. ISO provides detailed information to their member insurance companies.

*ISO is a private, for-profit company who assigns classifications of Fire Agencies to insurance companies that belong to their membership.

You or your insurance company can search the internet from the residence to the nearest fire station to determine the distance. Google, Waze, Mapquest or other map Apps may be used to determine the distance.

For other helpful insurance information, please refer to your local fire station information below:
