

The Deadly Duo

HF-500

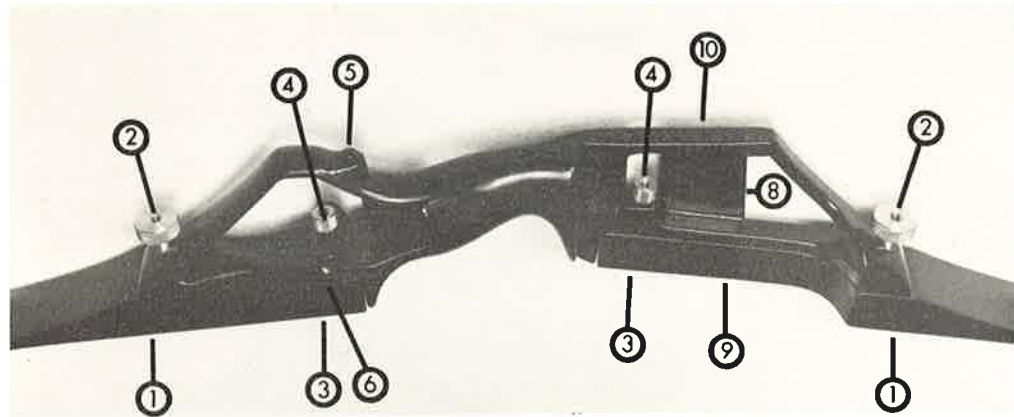

HF-1225

Black Widow hunting bows are made with the same exacting workmanship as the incomparable Black Widow target bows and are famous for their smooth stability and speed that means flat trajectory for the heavy hunting arrow that assures maximum penetration.

For the hunter who prefers the short bow the HF500, 56", is the perfect bow. And for those who prefer a longer bow the HF1225 with 60 and 64" limbs can be exactly right.

We invite you to test a Black Widow hunting bow with an arrow matched to the draw weight against any bow with the same peak weight or draw weight at 28" using the same weight arrow. Then see if you do not agree with us that Black Widow is the best hunting bow money can buy.

ASSEMBLY HF1225

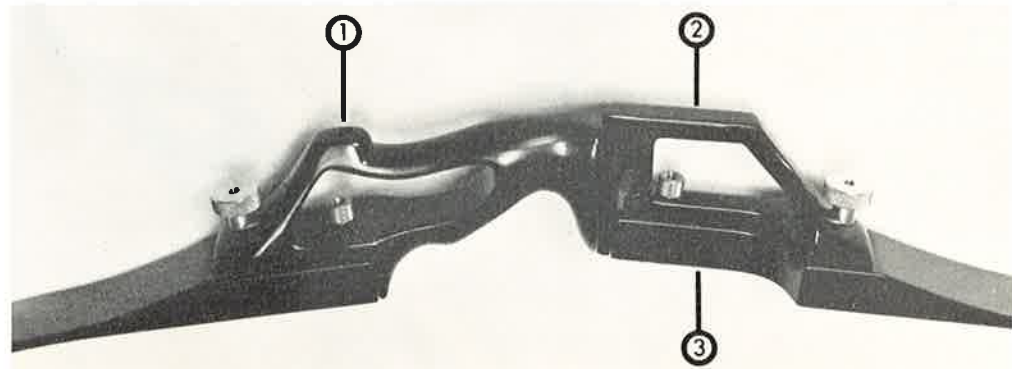

Assembly is precise and easy to do. (No. 1) is the location of inserts installed permanently in the limbs. (No. 3) is location of special flat head bolts installed permanently in the limbs. When (No. 3) is inserted in the handle the round, knurled nuts (No. 4) may be put on, however, do not tighten. Now, insert bolt (No. 2) and tighten with normal thumb and finger pressure while holding the handle section allowing the limb to self align. Then tighten (No. 4). All parts are precision made of solid brass and are epoxy treated to stop discoloration.

Each handle has a stabilizer insert with 5/16-24 threads (No. 5) and two built in counter balance mounts with 1/4-20 threads (No. 6).

There are various locations for sight mountings including the very popular side mount plate (No. 8). Also the back bar (No. 10) may be used. When using this position do not drill the top hole higher than 1/4" below the inside radius. Using wood screws sights may also be mounted on the limb section (No. 9). When doing this drill a hole just through the glass large enough for clearance of diameter of screw being used.

ASSEMBLY HF500

Assembly for the HF500 is the same as for the HF1225 given above. Each handle has a stabilizer mount with 5/16-24 thread (No. 1). Sights may be mounted on back bar (No. 2). When doing this do not drill top hole higher than 1/4" below the inside radius. To drill clearance for 6-32 bolts use 9/64" drill. If tapping for 6-32 bolt use No. 36 drill. Using wood screws sights may also be mounted on limb section (No. 3). When doing this drill a hole just through the glass large enough for clearance of diameter of screw being used.

SPECIFICATIONS MODEL HF1225

Limb lengths: 60 and 64". Draw weights up to 65 pounds.

Limb color: Satin Black.

Handle color: Satin Black.

String height: 60"—8 1/4 to 9 1/4";
64"—8 1/2 to 9 1/2".

**THE NEW IMPROVED WILSON TAB
(Black Widow)**

\$2.50

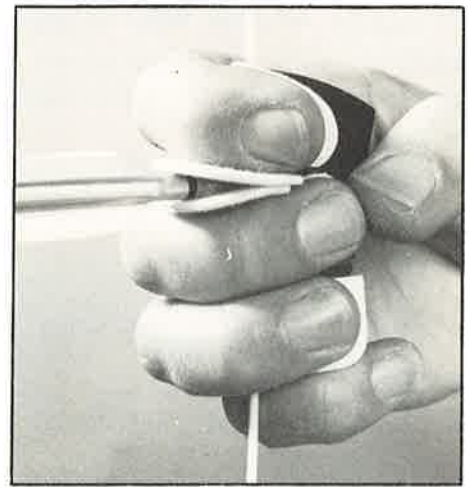

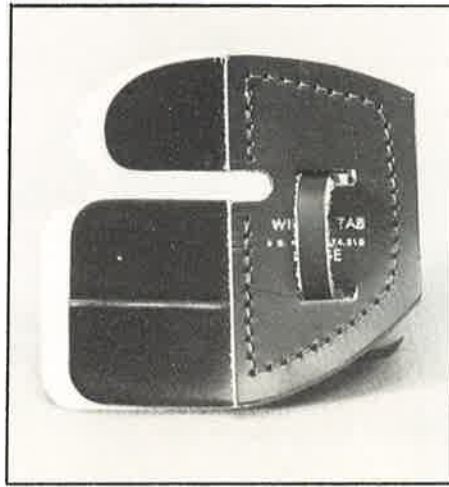

U. S. PAT. NOS. 2,974,319 — 3,608,090

Now with "Finger Fenders"

Available in five sizes, extra small, small, medium, large and extra large. Right or left hand.

Our new improved tab with "finger fenders" means no more blisters, sore spots or callouses on the first and second finger where they are squeezed against the arrow nock. The "finger fenders" give you complete protection as shown in the above picture. You will never find such comfort and relief from sore fingers with any other tab. And due to the special design, the "finger fenders" make releasing smoother, because they prevent the arrow nock from digging and pressing into the flesh of the fingers. And also, as illustrated in the above picture the "finger fenders" remain flat and in the proper position for protecting your fingers regardless of how deep a grip you take on the string. There is never any buckling or interference with the arrow.

Other patented features of the Wilson Tab eliminate a long break-in period. It is comfortable and permits an exceptionally smooth release right from the first. Tab face is smooth, long wearing corfam. The 100% pure wool felt backing acts as a cushion for the fingers and in hot weather absorbs sweat and keeps tab from feeling sticky. The finger loop is adjustable for a comfortable fit and so it can be worn over a glove in cold weather. If you want the finest Tab made, get a new improved Wilson Tab.

**3 SIZES—RIGHT OR LEFT HAND
ONE MADE TO FIT YOUR HAND**

MODEL A WITH CHIN-REST

MODEL B WITH CHEEK-REST

**THE WILSON
(Black Widow)**

STRAP - TAB \$9.95

U. S. PATENT NO. 3,604,407

Three sizes, right or left hand.

For men who wear up to a size 9 glove, the medium is usually the right size. If glove size is 9½ or more, the large size. Most women will use the small size, although some with fairly large hands may prefer a medium size.

The cast aluminum handle of the Strap-Tab will last for years and years. All other parts, the pulling strap, gripper pad, and handle cover are replaceable. Complete illustrated instructions are included.

Model "A"

Model "B"
