Judy (McElyea) Smith suffered a bad fall at the end of a visit at their daughters home, the end of July. Judy was in Hutch Reg Med a week before a transfer to the Dillon Living Center for Rehab. Talked to her this morning, her spirits were high from news rec'd yesterday: Latest Xrays showing good healing, therapist has her in new leg braces. She is now able to stand & take couple of steps. She hopes to be home by Halloween to pass treats. ☺

Updated note from Ron Montandon:

Just so you are aware we are now living at 1701 B Coventry Ct. This will be around three months or until our house is completed. Our mailing address is still the same we will pick up our mail from there. We were having a roof replaced and the shingles and felt were off they had replaced the felt and were going to shingle the next day. That was the night we had the high winds and heavy rains. At 6 to 7 inches came in through the ceilings and light fixtures. The contractors insurance company said they would take complete responsibility for the damage and had an adjustor come out to look at it. The roof contractor was there when he came out and said that this person did not have a clue about water damage all he wanted was out. His estimate came in at just over \$12,000.00 we sent the check back right away. As of today the total is at \$124,000.00 and still more to be added. They will be gutting the interior of our residence and also have to rewire the whole house to bring it up to code. I could go on but you can understand.

I had to get my insurance involved and everything will be taken care of down to the littlest detail. They are paying for the place we are now living along with utility bills and all the furniture we need. We even get dishes and silverware and washer dryer, and all the extras included. We will be out for a least two months and maybe more. The entire inside of our home has to be gutted to repair and all electrical replaced which will be included.
