The new Inσιο.

Custom-made, unnoticeable, effortless.

Tailor-made for the anatomy of your ear and your hearing loss, Inσιο™ is almost unnoticeable, and thanks to the touchControl™ App, extremely discreet. Despite its tiny size, it's packed with functionality that delivers effortless hearing across the entire Inσιο family.

Enjoy life's true sound.

Whether it's an office, a crowded store or a busy restaurant, wherever there's a high level of ambient noise, holding a conversation requires concentration and effort. Straining to hear voices in these situations is tiring – even for people with normal hearing.

The new Insio helps relieve this. The advanced SpeechMaster function continuously monitors what you are listening to and singles out the speaker of interest to reduce unwanted voices and background noise. You hear what you want but not the rest. As a result, hearing becomes effortless and less tiring – all day long, in every situation.

A day with the team and Insio.

A surprise encounter.

Standing on the platform on your way to the office with all the noise of a train station, a stranger asks for directions. As a train passes noisily by, Insio ensures you don't miss a word. Its intelligent automatic **SpeechMaster** function elevates the speaker of interest above other voices while also engaging **narrow directionality** and **noise reduction** to reduce the background sounds and voices outside your direction of attention – making it easy for you to understand what matters.

Lunch outdoors.

You grab a quick lunch with colleagues at a street café. As the conversation picks up, so does the wind. With Insio, catching every word is a breeze. Its automatic **SpeechMaster** function engages **eWindScreen™ binaural** to reduce the wind noise, focusing on the direction of the voices you're listening to.

Office distractions.

Back in the office, business is brisk but it's a cacophony of phones ringing and people talking. When someone asks for your opinion on a report, Insio manages superbly. Its automatic **SpeechMaster** function elevates the speaker's voice above other voices while **noise reduction** tackles the background sounds.

Later, at a welcome reception in the foyer, the announcer's voice echoes around the room. Insio's **EchoShield** program reduces the reverberation for better sound quality and greater listening comfort.

Tinnitus? Relief is at hand.

With its static and ocean wave **tinnitus therapy feature**, Insio provides welcome relief for tinnitus sufferers. Ask your Hearing Care Professional which solution is best for you.

Music fidelity you'll really appreciate.

Insio's **HD Music** program delivers outstanding sound quality to let you fully enjoy music. Whether you're enjoying your favorite music at a concert, listening at home on your own stereo system, or even on stage performing music yourself, HD Music offers an optimized and superb listening experience.

Extra touches for greater convenience.

Phone call clarity.

With Insio, phone calls are a snap. As soon as the phone is held to your ear, its **TwinPhone** feature transmits the caller's voice to both ears for better understanding. Or connect Insio to your *Bluetooth®*-enabled phone via **easyTek™** for hands-free calling and music streaming, and conveniently control it via the **easyTek™ App***.

Complete control in the palm of your hand.

The **touchControl™ App*** puts complete control of Insio at your fingertips. Change Insio's hearing programs and adjust the volume, bass and treble to suit your needs; you can even adjust the direction of the microphones. All you need is a smartphone.

touchControl App

Further accessories.

The **easyPocket™** remote control and the **VoiceLink™** companion microphone for easyTek further enhance Insio's easy handling.

easyPocket VoiceLink

* Compatible with Android and iOS. The app is free of charge.
