\#'s @ \$100 PER SQUARE
Last digit of score used to determine winner of each game in the tournament.
There will be 63 payouts throughout the tournament ( one per game ) following the schedule above.
Squares will be filled in with the purchasers names, and then the numbers assigned randomly for the winner and loser sides.
For each Tournament game, the final score will dictate the winner.
Example: 1st round game - Kansas beats Syracuse $79-13$. Person with the corresponding square ( 9 for winner, 3 for loser ) wins $\$ 50$, and so on Each game throughout tourney awards one winner the designated amount
44 OF 100 square's paid out in 2013
