**PROJECT NAME:** North Olmstead Fire Station  
**INSTALLED:** June 2007  
**DESIGN FUNCTIONAL CLASSIFICATION:** Emergency Access way  
**PROBLEM:** Vegetated load support needed for emergency access ways to transformers and generators  
**SOLUTION:** Presto Geoblock® porous pavement system was installed to provide heavy duty vegetated load support.  
**CONTRACTOR:** Mr. Excavator  
**OBSERVATIONS:** Contractor never used the product before and was able to do an excellent job. New vegetation is well established and Geoblock is not visible. Geoblock areas are easily demarcated as needed by fire departments.

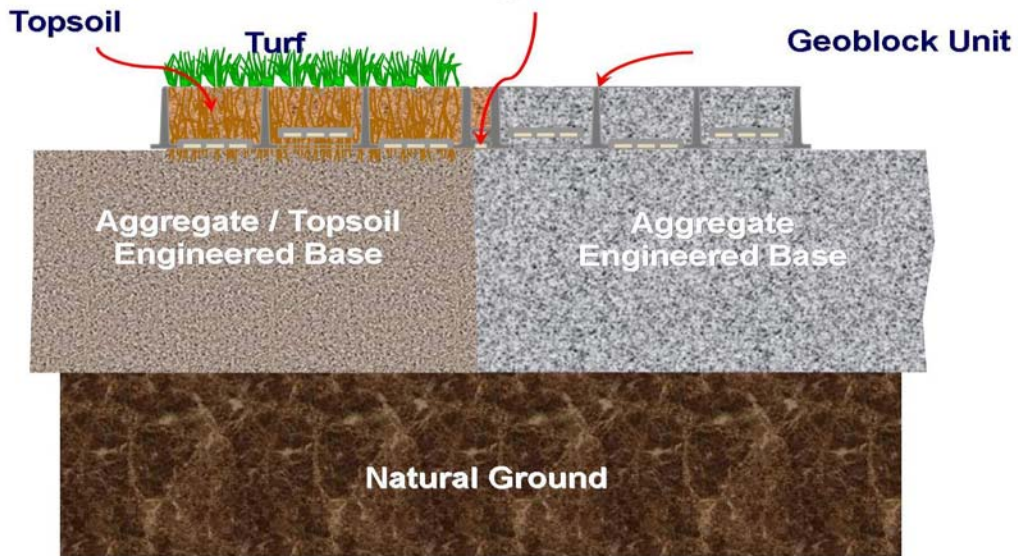

HOW DOES IT WORK?

**Geoblock Diagram**

Interlocking Tabular Joint

Our Product Information Lunch Seminars are Complimentary and also provide PDH Credits for Engineers and Landscape Architects.
