

30KW Generator (single phase)

This 30,000 watt single phase generator is diesel powered and mounted on a 4 wheel trailer with a 2" hitch for easy towing. It has the convenience of a very large, 100+ gallon fuel tank so you don't have to be concerned with frequent refueling to keep your event running. It is an extremely quiet running unit.

Power distribution to your vendors, stage, or whatever you are powering will only come from optional 50 amp cables and distribution boxes plugged into two 50 ampere/220 volt AC single phase outlets on the generator.
