DISCLOSURE OF SERVICES

In recognition that millions of Californians receive a substantial volume of healthcare services from complementary and alternative health care practitioners, California Law allows access by California residents to complementary and alternative healthcare practitioners who are not providing services that require medical training and credentials. The following disclosure is provided in compliance with Section 2053.6 of the California Business and Professions Code.

The purpose of a program of hypnotherapy is for vocational or avocational self-improvement (Business and Professions Code 2908) and as alternative or complementary treatment to healing arts services licensed by the state. A hypnotherapist is not a licensed physician or psychologist and hypnotherapy services are not licensed by the State of California. Services are Non-diagnostic and do not include the practice of medicine, neither should they be considered as a substitute for licensed medical or psychological services or procedures.

Hypnosis works with the power of the subconscious mind to change habits and behaviors. The subconscious mind is considered to be the source or root of many of our behaviors, emotions, attitudes and motivations. Hypnosis is believed to be a powerful tool for accessing the subconscious mind and creating improvements in our lives.

Services consist of a program of conditioning, including an undetermined number of private sessions, depending on the client's individual needs. The hypnotist will to the best of his or her ability endeavor to accomplish the objectives of the client's sessions. While hypnosis may be an effective technique for many purposes, the effectiveness may vary from individual to individual, and no specific results or progress can be promised or guaranteed.

During hypnotherapy sessions, clients remain completely aware of everything that is going on. In fact, many people experience a hyper-awareness where sensations are perceived enriched and vivid. The ability to visualize or imagine is enhanced. Deep relaxation is common. Many describe the hypnotic state as a complete and total escape from physical tension and emotional stress, while remaining completely alert.

The use of hypnosis could elicit memories of past events which may or may not be literally true. It is possible that events under hypnosis will be distorted or misconstrued. Memories or images evoked under hypnosis are not necessarily accurate and may be a construction or a composite of memories. Without corroborating information, it is not possible to determine whether a specific memory is true or false, even if it seems true to the client.

Jonathan Hyde, DBA Jonathan Hyde Hypnosis, is an independent practitioner operating in part in office space leased to him by Miller Psychology Group, and is in no way affiliated with Miller Psychology Group for purposes of business practices, assumptions of liability or any other association beyond the use of said office space.

While it is the practice of Hypnotherapists to keep information confidential, information revealed in hypnotherapy is not subject to the psychotherapist-patient privilege. A court may order disclosure of information learned in therapy. In the event of such a rare case happening, you will be notified and any and all subpoenas will be challenged to protect your private information. Your privacy is our responsibility and our top priority.

I have received a copy of this disclosure and understand the information described above.
