

Fragile X Syndrome & Angelman Syndrome Research at Rush

Who are we looking for?

We're actively looking for adolescents ages 13-17, inclusive, with fragile X syndrome or Angelman syndrome for a new medication study.

What does the study entail?

The study involves 2 visits over 2 weeks. Visits may include behavioral and cognitive assessments, blood and urine samples, and physical exams. Participants also must be able to swallow a capsule.

What is the cost?

Evaluations, study visits, and study medication are provided at no cost. Compensation for your time will be provided. Travel may be reimbursed, depending on need.

Interested?

If you are interested, please contact Anna De Sonia at (312) 942-7250 or Anna_M_DeSonia@rush.edu.
