

## Presidents Report AGM 2018

I would like to thank all our volunteers who have spent many personal hours and days to maintain the quality of our lake and increase the quality of life at the lake. Special recognition must go out to the MALLA executive members and the committee members who faithfully contribute their time, talents and resources to make our association successful.

The last 12 months have been busy with five separate social events. For the first time I was able to attend all five events and thoroughly enjoyed each one

In August the MALLA fishing committee members partnered with Watersheds Canada and the Junior Rangers Program to do a Shoal Enhancement (Pickerel Spawning Bed) on Ardoch Lake. A special thanks to Jerry White and Jim Boles for the use of their barges to move the rock. Also, a big thank you to Brian Schonauer for the use of his cottage property for the transfer of rock. Finally, a thank you to the wonderful ladies of the social committee who provided a very welcome barbeque lunch on day two.

This was the second year for the corn roast and it was a very successful and enjoyable event to wrap-up the month of August. This year's hosts were Kathy and Dave Smith.

The first social event of 2018 was the Winter Social on the ice in front of Don and Brenda Martins. It was enjoyed by all who attended. A very successful winter social with great food and great on ice activities. Many thanks to the members who spent hours preparing the ice rink in some of the coldest weather of the year.

The Ardoch Lake Condo development Proposal still looms over us like a dark cloud. The final decision on the development is unknown at this time.

Our association needs to attract new executive members and volunteers. Without new blood in the association our current volunteers will burnout and the association will disappear. If you have ever considered being a volunteer or member of the executive please make yourself known to us. We need you!

Have a wonderful summer and please participate in our association social events.

Glen Fowler
