

April 17-23, 2017

Rochester MN

Rochester EarthFest and Expo celebration is a seven day, volunteer-led lineup of events consisting of several Earth Day related activities at various locations around the area. Assisi Heights, Quarry Hill, Squash Blossom Farm, Olmsted Waste-to-Energy Facility, Habitat for Humanity ReStore and area High Schools are all participating

One of the activities will be a combined Climate March/Science March & Rally at the Peace Plaza in downtown Rochester to encourage folks to be an integral part of something huge. Together we can be the change!

The culminating event is the April 23rd Expo, a daylong celebration advocating sustainable living through education, interactive displays, and the promotion of healthy and green products.
