

Mat Stacks Carts

The Mobile Option For Your Logo And Oversize Mat Storage

The Mat Stacks special mat storage platform is now available in cart form to help optimize your floor space and improve productivity by adding the element of mobility to your special mat storage

Logo Stacks

The Standard Logo Stacks cart has eight 48 inch deep trays with 4 mats per tray for a total of 32 individual logo mat storage locations

Oversize Stacks

The Standard Oversize Stacks cart has six 60 inch deep trays and is available with 3 or 4 section trays for either 18 or 24 individual oversize mat storage locations.

P&E Products Your Mat Handling Experts

All of the Mat Stacks carts are equipped with 4 swivel casters for excellent maneuverability in tight production and storage areas.

The mat storage trays are the same galvanized steel tray that we use in the standard Mat Stacks stationary storage system. The tray is just under 30 inches wide with 4 or 3 divider sections built into the tray.

There is 1/2 inch wide angle on either end for labeling each location. The cart can be accessed from either end.

Custom Mat Storage Carts

We can also provide special size carts to meet your unique needs for storing all of your special handling mats in a mobile platform.

The photo at the left shows a stacking cart concept that we have been considering to conserve floor space. 2 carts each holding 40 mats in a single cart footprint.

You will find more information on our Mat Stacks Carts as well as the Mat Stacks storage system at www.matstacks.com.
