Scholastic Learning Information

We want you to know that Scholastic is here for you, your teachers, and of course, your students and their families. Regardless of your virtual learning plans, preparing instructional content for weeks away from school can be daunting. To support you, we've created the Scholastic Learn at Home website. This free resource provides all students with 20* days' worth of learning journeys that span the content areas so you can keep your students academically active while your buildings are closed.

The site supports students with approximately three hours of learning opportunities per day, including projects, articles and stories, virtual field trips, reading and geography challenges, and more. These daily learning opportunities were carefully curated by our editors to reduce the burden on teachers and families needing to create meaningful learning experiences.

The Scholastic Learn at Home website does not require a username or password and is open freely to all, on any device. They are designed to limit the need for printing and allow students to learn independently or with their families.

www.scholastic.com/coronavirus - Teaching our World: The Coronavirus

*The site will be updated weekly until all 20 days of content is available.
