	per initial DVD/video		
	Estimated number of DVD equivalents in project = total # of 2 hr tapes or groupings, rounded up. A standard DVD can hold up to 2 hour of video. Tapes exceeding 2 hours require additional DVDs. Shorter tapes can be combined onto a single DVD to fill up the 2 hours. For example, four 30-min tapes can be combined onto one DVD. Be sure to clearly identify any desired tape groupings or sequence. Unless otherwise instructed, we will group tapes as we deem appropriate to produce as few DVDs as possible without splitting any tapes across multiple DVDs, and will use multi-disc cases for multi-disc projects. DVDs include at least one main title plus time-spaced index markers. Brief titles from additional grouped tapes may or may not be used.
