

This certified list of ingredients comes from the prostheses over which the trial was instigated and is EXHIBIT B, Fourth Division, Judge David S. Doty, May 1992. Chemicals and heavy metals, usually platinum, *are included in all gel implants* and are necessary to achieve and maintain the desired honey-like consistency.

***Implant Raw Materials***

ACETONE ACS REAGENT SOLVENT  
ALUMINA, ACTIVATED FILLER  
CAB-O-SIL S-170 SILICA-BAG FILLER  
CHLORETHENE-BULK SOLVENT  
CHLORETHENE-DRUM SOLVENT  
CHLOROPLATINIC ACID 0.4% PLATINUM  
DIETHYLENE BLYCOL MBE ACETATE SOLVENT  
MEDICAL ADHESIVE A.MISC. ADHESIVE  
ETCH ETHYNYL CYCLOHEXANOL PROCESS AID  
ZINC STEARATE SURFACTANT <sub>2</sub>

At the time of the trial, Dow entered a permanent order to seal the list of evidence. Platinum is the most noxious of all the toxins listed. Today, extensive lists of such formulas are readily available in the memos and proprietary notes that the Document Investigation and Review Team –the D.I.R.T. committee overlooked.
