

Whisenhunt Farms

puppy agreement

Breeder:

Amanda Whisenhunt

164 Whisenhunt Loop-Nashville, AR 71852----870-845-9714

Buyer:

Breed/Sex

Date of Birth/age of dog:

Color/Description:

Selling Price:

Registration:

The following contract is binding...." I " is hereafter in reference to the Seller: Amanda Whisenhunt.
Puppy is interchangeable with canine of any age unless otherwise stated

LIMITED 72 Hour Warranty

In the event that this puppy is found to be unhealthy by the opinion of a licensed veterinarian or has any

physical problems that will limit the pups quality of life- I will replace the pup as soon as one becomes available. If you choose a puppy of greater value for your replacement than the original purchase price the difference must be met by the buyer. You must take your puppy to a vet within 72 hours from the date of purchase to make this claim valid. The puppy must be returned to me on that same day as veterinary examination. A written document from your vet is required. All warranties apply only to the original buyer. There are NO REFUNDS. This is a limited warranty requiring a 72 hour exam time frame.

Arkansas Law states a 10 day limit on other terms deemed as "unfit" based on disease or defect being limited to financial responsibilities from the seller in veterinary treatment should they be necessary. This law is restricted only up to the point of purchase price of the puppy & never a reimbursement for the puppy itself. Replacement pups are limited within the 72 hour window at the seller's honor of this agreement.

I can not guarantee the size the dog will become or the quality of work a dog will offer at maturity. If you can not keep your dog for any reason during its lifetime you may return the dog to me to find proper placement. This is not required but accepted! Original paperwork should accompany any returns..... there are NO REFUNDS

STRONGLY RECOMMENDED

DO NOT take your pup to public places and allow to be on the ground until all routine vaccines have been given, usually around 4 months of age. I can not guarantee against Parvo contamination and is your responsibility to protect your pup. The pup is being sold with up to date shot records and internal parasite prevention. Internal & External parasite prevention MUST be continued routinely.

Working guarantee:

Puppies purchased from Whisenhunt Farms and are accompanied by this signed contract are guaranteed to work. This guarantee is limited in that the buyer agrees to protect the puppy during maturity from livestock not suitable for its age. The dog should not be allowed to run free unsupervised near livestock of any kind. If the buyer is found to be negligent in early exposure to livestock not appropriate for its age or have allowed the dog to run free unsupervised then this portion of the agreement is null/void. The guarantee for work is very limited in nature..... I can only guarantee that the pup will go to stock by 14 months of age. If your dog shows no interest in stock of any kind I will replace the pup with another pup of the same sex & of equal value as original purchase- as soon as one becomes available. I do request a notification by 12 months if no interest has yet to be found and MUST be notified by 16 months of age or this offer is void. The original dog is subject to being returned or evaluated by another experienced trainer of my choosing in your area before the

replacement pup will be given. Puppies are a gamble in stock work and it is my advice that if you are set on a certain level of power and confidence that you do not purchase a puppy but rather look for a started or finished dog for your expectations. Puppies are considered sold at companion prices and should only expect that for the original investment price, however I breed for work and will stand behind pups sold within the limits stated. This agreement is only binding to the original buyer.

Hip-Elbow Dysplasia/OCD:

This puppy is protected with a replacement puppy warranty should they be officially diagnosed with OCD before 1 year of age.

This puppy is protected with a replacement puppy warranty should they be officially diagnosed with mild to moderate hip or elbow dysplasia before 1 year of age. Borderline to Fair ratings are not included in this warranty. Should a Borderline rating be given in the first year the warranty will be extended to 26 months of age ONLY if the dog was preliminarily diagnosed by 1 year and the seller contacted to write up an extension of agreement. A signed amendment must be added by both buyer and seller by 13 months age of the dog.

It is recommended to limit repetitive motions in young dogs and to keep your pups lean and growing at a steady rate. Do not overfeed or over exercise your dog with back and forth motions or stairs during early development. Following these restrictions as well as proper nutrition and routine preventive care will help reduce the odds of environmentally influenced OCD and Dysplasia.

Terms for this replacement puppy are limited to official veterinary diagnosis accompanied by x-rays w*/ith OFA or equal statements on prelim evaluation required on hips. The cost for testing and veterinary expenses are the responsibility of the buyer.

Seller reserves the right to request a second opinion or further testing. Should secondary opinions result in same diagnosis the seller agrees to pay for the second testing. Second opinion testing performed at the Buyer's decision is the responsibility of the buyer.

The buyer may choose to keep the original dog purchased after a replacement pup has been given however at that point all costs accrued are responsibility of the buyer and the animal must be spayed/neutered. Should the buyer breed or sell intact the original dog purchased under this agreement they are in breach of contract. Registration papers of original dog MUST be returned to seller along with proof of spay/neuter.

IMPORTANT IF this dog was bred prior to 1 year of age at time of diagnosis this warranty is void.`

Congenital issues:

This puppy is warrantied until 1 year of age in regards to any veterinary diagnosed congenital issue that

is life threatening or will directly affect the dog's quality of life. A congenital issue is that of a physical deformity or disease that is present from birth. A second opinion may be requested by the seller with costs accrued being the responsibility of the buyer. IF the second opinion is found to be the same as original diagnosis then seller agrees to reimburse those costs after documented proof has been submitted of costs. Should the second opinion be requested at the buyer's choice then those fees are not obligated to the seller. A replacement puppy of equal value and sex will be given at next availability. The buyer may choose to keep the puppy under spay/neuter agreement and assume all future responsibilities or return to the seller. Original registration and proof of spay/neuter must be sent to seller.

Epilepsy:

Epilepsy unfortunately cannot be tested for and can be unpredictable. Should your pup develop Epilepsy before it's 3rd birthday a replacement pup of equal sex and value will be replaced as soon as one becomes available. Should you choose to keep your dog they should be spayed/neutered with proof and original registration papers returned to seller. It is not in my opinion ethical to breed epileptic dogs. It is encouraged to try to find a possible cause of any neurological symptoms through testing with your veterinarian. If you had bred this dog before this date it is recommended that you contact any puppy buyers to notify them. Should this dog have been used as a Stud or producing bitch then the stud owner or bitch owner of pups produced claim those responsibilities.

Breeding:

This puppy is not guaranteed as breeding quality based on structure, temperament, working ability, or any other issue that may disqualify this puppy as a breeding candidate.

Health testing:

Your pup is guaranteed to be free of the following testable hereditary diseases. Carriers are not affected in any way however proper testing should be done on potential mates to prevent affected pups in the next generation. Any future breeding plans or testing that may become available with your pup is the responsibility of the buyer.

Notations will be made beside each of the following diseases- if either parent are a carrier then your pup may be a carrier and should be tested. This testing is only necessary for future breeding purposes. THERE IS NO AFFECT ON CARRIER PUPS!!! It is the responsibility of the buyer to research and

understand all hereditary and common diseases within the breed and most especially if they choose to breed in the future.

As years progress forward other disease testing may become available this contract is only including the following.

Other:

There are many things that cannot be predicted within the life of a dog. This agreement LIMITS a warranty ONLY on the things mentioned within this agreement and under these terms.

Excluded but not limited to: retained testicles, hernias, EOD, reproductive abilities in males or females, allergies, cancers, PRA, Glaucoma, BCC, hip, elbow or OCD type dysplasia diagnosed after 1 year of age, diabetes, addison's disease, or any other illness or disease.

I strive to breed healthy dogs with healthy lines that are proven for working abilities. I breed for WORK, HEALTH, and TEMPERAMENT- the temperament of a weaning puppy cannot always be predicted there is no guarantee that he/she will be a perfect match in temperament or working skill for the buyer and is therefore released of any lifetime obligation should you feel another home is better suited for your pup. This pup is sold without restrictions on breeding rights unless otherwise stated. We encourage future communications with us should any unforeseen issues arise.

Shipping costs are the buyer's responsibility in all purchases or necessary returns. Seller will try to reach a compromise in travel and return expenses should they be necessary to fulfill the terms of this agreement.
