

## b Breeze - Patient App: iOS

# Understanding the Patient App

The Breeze Patient App for iOS connects you to your medical practice. Breeze helps you access your medical information, request appointments, and make payments.

### App Landing Page

When first signing into the app, you will arrive in **Appointments**, displaying future appointment activity.

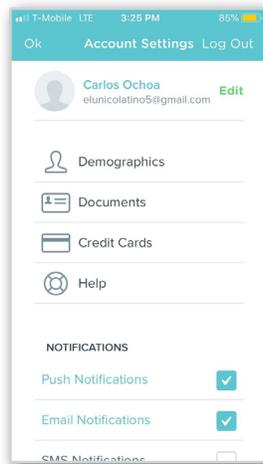

There are several icons that navigate to different areas in the app:

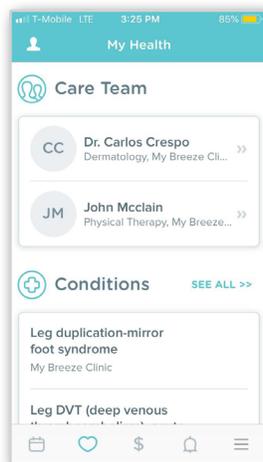

1. Account Settings
2. My Health
3. Payments
4. Notifications
5. Menu

### Different Sections of the Breeze App

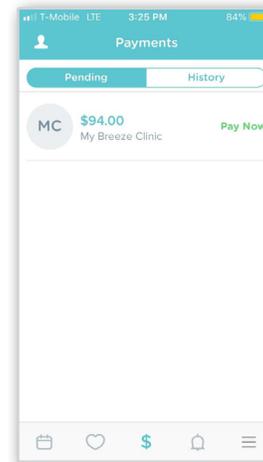

**Account Settings** - Provides access to manage and edit your account information.

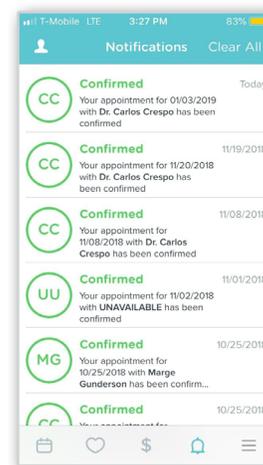

**My Health** - Provides an overview of conditions, medications and allergies. You also have access to your medical record in this section.

**Payments** - Provides an overview of pending balances as well as payment history. You also have access to make payments in this section.

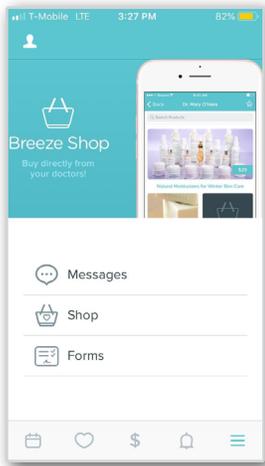

**Notifications** - This section displays a list of activities completed in Breeze.

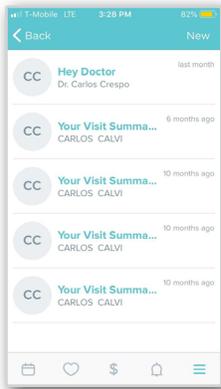

**b** Breeze - Patient App: iOS  
**Understanding the Patient App**

**Menu** - Provides access to additional sections in Breeze.

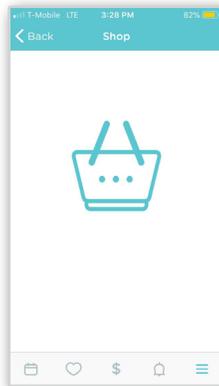

These sections include:

a. **Messages** - Provides access to communicate with your providers. As you complete visits at the practice, a downloadable visit summary is sent as a message.

b. **Shop** - Provides access to your practice's online shop.

**Note:** This feature will only appear if your practice has set up a shop with Breeze.

c. **Forms** - Provides access to forms completed at the office. Forms assigned to you for completion can be accessed here.
