

## **The Mycestro Smart Ring**

This wearable 3D printed mouse that you can wear on your finger and operate a computer using gestures and thumb actions. Mycestro connects to your computer, tablet, or other devices by Bluetooth wireless connection. The computer to be controlled requires a USB dongle for Mycestro to work. You can control your computer from up to 10 meters (30 ft) away.

Mycestro comes with a desktop app, which allows you to customize all the details of your mouse and cursor by using natural gestures. It works with Windows and Apple devices.

Mycestro makes life easier at the office, as it allows you to multi-task, and use the mouse.
