

Swiftwater Recovery Specialist (SRS)

New for 2013 the Rescue 3 International Swiftwater Recovery Specialist (SRS) is a two day upgrade course for Rescue 3 International Swiftwater Rescue Technicians to learn the complexities and techniques of body recovery from shallow depth swiftwater environments. Developed by international experts and using the latest research to provide an evidence based curriculum, this two day course covers legal authorities, disaster victim identification, recovery incident management, decomposition, infectious disease control, psychological considerations, management of family and media, evidential recording for law enforcement, specialist recovery equipment, methods and a series of recovery exercises.

As this course uses real footage of body recoveries and decomposition, this course is not suitable for those who may find such information and viewing upsetting.

Standard:	Rescue 3 International
Prerequisites:	Swiftwater Rescue Technician 1
Equipment:	Type III- V PFD, water rescue helmet, water shoes, water rescue Gloves, thermal protection (wetsuit/dry suit) if water conditions warrant.
Tuition:	\$315
