

## **Instructions to Authors**

Authors are instructed to prepare their entire manuscript as a single file using Microsoft Word format with Times New Roman font style, 12 font size and double line spaced with margins of at least one inch on all sides. All the headings and sub-headings should be in bold letters with sub-heading in italics. Do not include numbers for headings and sub-headings. Pages should be numbered consecutively. The content of the manuscript should be arranged in the following order; Abstract, Introduction, Materials and Methods, Results & Discussion, and Conclusion, Acknowledgements, Conflict of Interest and References. Separate cover letter mentioning originality of the research work reported in the manuscript and the manuscript submitted to IJIE is not submitted elsewhere or nor under consideration for publication in any other journal.

## **Online Manuscript Submission**

Online submission of manuscript is encouraged. However manuscripts can also be submitted through email (ijie.editor@gmail.com) in case of any problem in online submission system.

## **Article Review Process**

Manuscripts submitted to International Journal of Industrial Engineering will be peer reviewed by independent reviewers. The opinion of the reviewers and their comments along with editorial decision (Accepted/Accepted after minor revision/Accepted after major revision/Rejected) will be sent to corresponding author for further revision and resubmission of manuscript.

## **Review Articles**

The extensive review articles from current thrust research areas are published as review article. Review articles should be minimum 8 printed pages with minimum 50 references and 2 either figures/tables.

## **Original Research Articles**

Research articles should have separate Abstract, Introduction, Materials & methods, Results & discussion and Conclusion sections with maximum of 8 either figures/tables.

## **Short Communications**

Preliminary research findings of any research work/investigations can be submitted in the form of short communications with maximum of 4 either figures/tables.

## **Title page**

Title of the manuscript should reflect the scope of the manuscript in the selected area of science and technology. Title should be in bold letters, times new roman, 12 font size and center aligned. Include authors surname followed by given name in bold letters. Authors with different affiliations should be marked with superscript number in given name (K. John<sup>1</sup>, M. J. George<sup>2</sup>). Affiliations in should be given below the author names and centre aligned. Affiliations should start with author's affiliation number in superscript with postal address including postal code without designation.

## **Abstract**

Abstract should be written consciously within 150-250 words. Abstract should highlight the scope, novelty in approach, key findings, and scope of the findings for current applications or further development. Provide 4 to 6 keywords at the end of the abstract. Keywords should be within the scope of the work presented in the manuscript.

## **Introduction**

Introduction should describe the summary of background work available in the literature with suitable references. Clearly indicate the aim and scope of the research work reported in the manuscript.

Introduction should support the scope and aim of the manuscript. Introduction section can be divided into 3 to 4 paragraph with total 500 to 700 words.

### **Materials and methods**

Material and methods can be described under various sub-headings. Each sub-heading should clearly describe various materials, instruments, equipments, software used with their specifications, supplier etc. Materials and Methods section should include clear methodology adopted with sufficient details to repeat the experiment.

### **Results and discussion**

Combined results and discussion section is preferred. Results should be interpreted consciously and discussed. All tables and figures included should be mentioned and included in the main body of the text after its first instance of mention in this section.

Figures should be clear and reproducible with axis name and values in the same format of the text. Figure title should not be incorporated inside the image. The x-axis and y-axis axis should be clearly mentioned with axis name and its unit in figures. No horizontal or vertical grid lines are allowed in Excel based figures.

### **Conclusions**

Conclusions should be written consciously out of the results reported in the manuscript. It should highlight the potential finding and outcomes of their research findings reported in the manuscript. It should not be simply repeated from results discussed under Results and discussion. Conclusion section should be given in one paragraph with maximum word count of 250 words.

### **Conflict of interest**

Authors should state their conflict of interest with various stakeholders. Mention “No conflict of Interest” if there are no conflict of interest with the authors.

### **Acknowledgements**

Authors should state their funding agencies/organization if any, provided by private or government agencies/organization for their research findings reported in the manuscript. Authors can also mention the individuals involved during this research work but not included in authors list can also be acknowledged.

### **References**

References should be mentioned in the text using numbers within square bracket eg. [1]. All the references should be listed at the end of the manuscript under a separate heading “References” with continuous numbers as cited in the text. Unpublished sources should not be included in the reference list.

Totals number of references should be minimum 10 to maximum 15 for short communications, minimum 15 to maximum 30 for research articles/mini review and minimum 50 to maximum 100 review articles.

The list of references under reference section should be in the following format (Vancouver)

**Article Proofs**

Galley proof will be sent to the corresponding author of the manuscript. Galley proof must be carefully checked and returned to the editorial manager within 3 working days of receipt of the galley proof.

**Publication of Accepted Articles**

All accepted manuscript will be published online quickly as soon as the corresponding author's response to the proof of their manuscript. Normally it will be published within 3 days from the date of acceptance.

**Article Processing Charges**

Currently there are no article processing/publishing charges collected from authors. All the accepted articles are published freely for open access. Authors and readers can download the published articles without any cost. G. J. Publications is not supported by any private or government agencies. Thus we welcome voluntary financial contribution by authors and other supporting bodies to meet editorial expenses.

**Publication Ethics and Malpractice Statement**

Authors should submit their signed "Publication Ethics and Malpractice Statement" while submitting their manuscript to comply with open access policy, publications ethics and malpractice statements. Manuscripts will be sent for review process only after the receipt of signed "Publication Ethics and Malpractice Statement" from corresponding author.

**Plagiarism**

Manuscripts are accepted for publication assuming they are not previously published elsewhere either in part or full or in any other form (electronic or printed) that represent a significant portion of the research work except in the form of abstract in conferences. Authors are responsible for all content of accepted manuscript or any kind of misrepresentation of data including plagiarism.

**Disclaimer**

Authors are responsible for any errors, mistakes, misrepresentation of data by negligence or intention of any author of the manuscript in their published articles in G. J. Publications. No responsibility is assumed by editors or the publisher.
