About EZ-MAT

EZ-Mat Fold-N-Go Patio creates a raised clean and dry area around your RV and helps reduce the dirt or mud that can be tracked inside, while also creating a breathable area for the grass underneath. Made from lightweight, durable polypropylene plastic, this 5'x10' portable patio simply folds into a compact 2'x5' section that can EZily be placed in a storage compartment or cargo area. Sections can even be linked to create an even larger patio area. It is also EZ to clean by simply sweeping or spraying with a hose.

Available in black or white.

Multiple units can be used to create an even bigger patio area.

Your EZ-MAT will keep you above wet ground up to 1" deep. No more towels on the floor of your camper. Simply leave your rug outside the door on top of your EZ-MAT and it will stay clean and dry. No more tracking in mud or water after a hard rain.

Uneven Ground? No problem...No need for manicured recreation areas. Your EZ-MAT will lay on uneven ground and still give you a sturdy and clean patio to improve your camping conditions in the most secluded of areas. Hustlers...you're welcome.

On the job? We all need a way to pay for our toys. Working men and women, you can use the EZ-MAT to keep your home away from home clean and tidy.

Clean with ease! Just sweep or spray with a hose. Even stubborn caked on mud isn't a problem. Household cleaners or degreasers can also be used if needed.
