SUMMARY

Seasoned Field Technician with 15 years of experience in equipment maintenance, repair, and service. Skilled in troubleshooting technical equipment, managing inventory, and interpreting schematics; adept at ensuring equipment quality and safety. Seeking a Field Tech role to apply extensive background in electrical systems, parts management, and PLC programming.

WORK EXPERIENCE

GD Energy and Product

San Antonio

Field Technician

Aug 2022 - Apr 2024

- Troubleshoot, tested, repaired, and serviced technical equipment to ensure optimal functionality and performance.
- Managed and organized fluid end parts for transportation, contributing to operational efficiency.
- Collaborated with multiple departments to balance workloads and streamline process execution.
- Performed comprehensive inspections, maintenance, and replacement of frac pump components, documenting all procedures in the Customer's CMMS.

Dixie Electric Company

Hobbs, NM

Electrician / Field Technician

Apr 2004 - Oct 2015

- Executed installation and maintenance of electrical systems in various commercial and residential projects, maintaining strict compliance with safety standards.
- Conducted replacement and rewiring of defective motors, ensuring proper alignment and functionality post-installation.
- Led and mentored apprentice electricians, fostering skill development and precision in circuit installation and blueprint interpretation.
- Provided expert repair and routine servicing of electrical equipment, including proficiency in Allen Bradley and Siemens PLC programming.

US Navy

Patuxent River, MD

Aviation Machinist's Mate

May 2001 - Oct 2003

- Collaborated with team members to ensure the proper maintenance and repair of aircraft engines, propellers, and related systems, ensuring operational readiness and safety.
- Conducted detailed corrosion control and inspections, contributing to the longevity and reliability of aircraft environmental and utility systems.
