Age-Appropriate Transition Assessments and Activities Guide

The results of age-appropriate transition assessments form the foundation of the student's transition plan. Transition assessments should begin well before the IEP team meeting where the transition plan is to be developed to ensure meaningful, high quality information is available for the IEP team to consider. t.ly/BJreE

EMPLOYMENT

Project Aspiro
A career planning and employment resource for people who are blind or partially sighted

The Transition Competencies Checklist
The Transition Competencies Checklist (Wolffe, 2011) is designed as a self-evaluation tool for secondary students to assess their strengths and weaknesses in skill areas critical to the transition from school to work and adult responsibilities. Once they have the results of the checklist, students can communicate with their parents, caregivers, and education and rehabilitation personnel, about their needs (academic, vocational, social, and personal). They can also use the checklist to set goals and document their progress as they plan for the future.
