### **Green Endeavor Inc. Helps Vital FSM Petro Corp. Clean-up Safely and Efficiently**

*(Portland, Oregon – September 17, 2014)* In a proactive move to mitigate any accidents or emergencies that may occur, [Vital FSM Petro Corp](#) has engaged [Green Endeavor, Inc.](#), the eco-focused solution provider to industry™ and it's Guam-based affiliate Green Endeavors, to analyze and assess their operations and provide safer industrial cleaning solutions.

Vital FSM Petro Corp is an independent terminal operator based in Guam that owns, operate and leases seven fuel terminals, thirty-seven storage tanks and pipeline systems, and a fleet of fourteen bulk trucks and aviation fuelers across Micronesia. The company strives to maintain high standards to protect the fragile eco-systems within the Federal States of Micronesia where their facilities are located.

"We deal with the most difficult of oils on a daily basis. It is heavy and thick and can be difficult to pick up and absorb. Green Endeavor analyzed our needs and provided products that absorbed a spill of bunker oil, leaving it completely innocuous without any residual oil that normally would have remained. I have been in the oil business for over 20 years and have never found a product to completely absorb oil so easily and quickly. We are confident that for daily operations, and more importantly in any emergency, the solutions provided by Green Endeavor will not only get the job done safely, with minimal environmental impact, but they will make our clean-up efforts easier, saving us money and time," said Danny F. Guerrero, Technical Service Consultant at Vital.

For the past three years Green Endeavor has provided solutions to a broad range of industrial leaders in a number of markets including agriculture, automotive, food and beverage, and transportation. Among the companies who have realized the benefits of using GEI products and services are [Parker Hannifin Corporation](#); [Hillsboro Aviation](#); [Kellogg's](#); [The Long Company](#); [Wedgworth's](#); [Capstone Turbine](#); [Ponzi Wines](#); and the [Massachusetts Institute of Technology](#).

"We are very happy to increase our presence and offer our services and products throughout the FSM. Our affiliate, Green Endeavors, understands the complex needs of the region and we hope to continue to be part of the solution to help protect the environment and workers while supporting industry throughout the region," said Vince Loglisci, COO of Green Endeavor Inc. Along with Vital, Green Endeavor Inc. is also providing services and products for Guam based companies including [Morrico Equipment](#), Guahan Waste, [Cabras Marine Corporation](#), and the [Guam Solid Waste Authority](#).

In August, Green Endeavor Inc. announced the formation of a cooperative collaboration with [UL Environment](#) that will provide a certification process providing standards and validation for GEI solutions, giving industry the assurance that the products are subject to testing against rigorous standards and are viable alternatives to the chemical solutions currently being employed.
