

Perennial Ryegrass

Pillar

Benefits:

- ✓ Great Salt Tolerance
- ✓ Fine Leaf Texture
- ✓ Good Wear Tolerance
- ✓ Great Turf Density
- ✓ Handles Close Mowing
- ✓ Early Spring Greenup

Seeding Rates:

Permanent Turf:
7-8 lbs./1,000 square feet

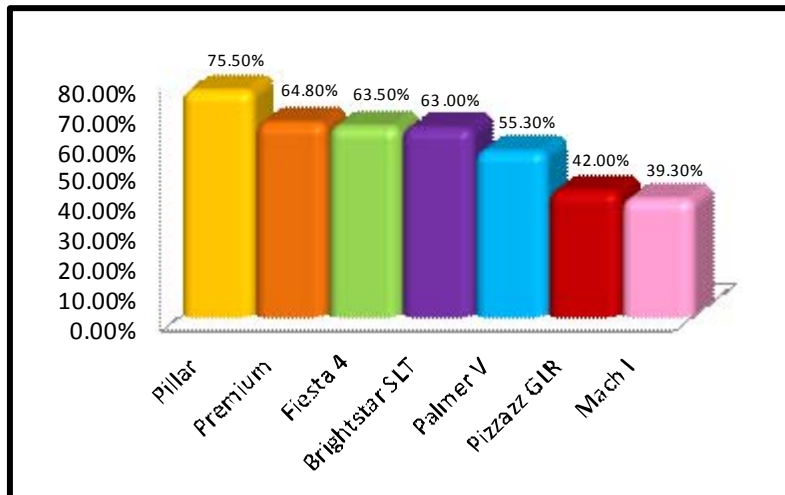

Overseeding:
3-4 lbs./1,000 square feet

Overseeding Warm Season Turf:
10-20 lbs./1,000 square feet

Pillar perennial ryegrass is the latest variety from Columbia Seeds® that was selected with salt tolerance in mind.

Other characteristics that helped us select **Pillar** were early spring greenup, wear tolerance and good density during the growing season. **Pillar** does offer some resistance to other diseases like pink snow mold and brown patch

Pillar is ideal for permanent turf or for overseeding into warm season grasses and blends well with other cool season grasses.

2010 NTEP Perennial Ryegrass Test-2011 Data. Adjusted Percent Cover ratings @ 12,500 PPM (salt tolerance in greenhouse) Top variety Rino-vo (94.8%) and bottom variety IS PR 492 (10%). LSD 39.6%. The adjusted cover ratings show percentage cover in each pot as compared to the 5,000 PPM level which is the base or starting level. See full report and more data available at www.ntep.org
