

EMS Operations Management & Leadership

A Wisconsin Office of Rural Health Workshop

The Wisconsin Office of Rural Health is accepting registrations for the Wisconsin EMS Operations Management and Leadership course. This one and a half day course will dive into management of daily tasks, including on-call schedules and budget development, creation and revision of policies and procedures, identifying and filling out required state forms, and much, much more.

Who Should Attend?

The course has been developed for the benefit of those in EMS management positions and those aspiring to management positions. Leadership interested in guidance or clarification on issues, and those interested in becoming a supervisor, manager, or leader in their agency should attend. Your instructors are Dana Sechler, former State EMS Advanced Life Support Coordinator and current EMS Chief/Service Director and Dan Williams, former State EMS Chief and 25-year Service Director, partners at Strategic Management & Consulting.
