

**Dementia** – People with Dementia can experience loss of cognitive function, memory impairment and difficulty to orient time and space. When symptoms of Dementia enable interactive systems, to react appropriately to everyday situations that occur in daily routines, it's time to make the call for help.

**Horizon Health Network** can provide that daily routine in familiar surroundings with familiar, friendly, experienced staff. We can provide the consistent care that a person with Dementia needs to help them function better, in a safe managed environment. It is important to not go at it alone. Reach out to form a larger team of family, friends and others who can help you.
