

Social Distancing Guidelines for Junior Croquet Players

Revised 06/04/20

The following Social Distancing Guidelines for Junior Croquet Players are in addition to the Social Distancing Guidelines for Croquet listed on the Home page.

1. No more than eight players are permitted to play at any one time during a Junior session.
2. There will always be at least one adult coach near the court during a Junior session.
3. When mallets and balls are removed and returned to the room, they will be cleaned with disinfecting wipes before and after the equipment is used. A canister of wipes is located in the equipment room.
4. Due to other groups scheduling the court just before the Junior group sessions, the equipment room will not be opened until a few minutes the start time of each Junior session. This is to help maintain the six feet of separation guideline for players entering and leaving the court and the equipment room.
5. There are no water barrels on the Golf Course. Junior members should bring their own water or drinks and not share with the other players.
6. There may be adult players playing before or after the Junior sessions. Junior players should not be near the croquet court before or after their scheduled time. They should wait for their rides up at the parking lot and always maintain at least six feet of separation while waiting.

Because these guidelines are very different than we are accustomed to, players and coaches are encouraged to gently remind others to follow them when they notice other players not complying with them.

These guidelines are the MINIMUM precautions for play. All parents and Junior players must decide about any additional measures they think are necessary for their safety including a decision not to play.
