## Medicare Savings Programs

If you or someone you know is having trouble paying for healthcare costs in these uncertain times, there may be ways to save money on Medicare premiums and other costs.

You may be able to get help from your state to pay some of your Medicare costs, including your monthly premiums. In some cases, Medicare Savings Programs may also help pay your deductibles, coinsurance, and copayments if you meet certain conditions.

Call NWKAAA to see if you qualify for a Medicare Savings Program.
