

Member Feature - Jenni Huber

Why did you join LPAS?

I have a passion for learning and continuous improvement so I can't pass up the opportunity to interact with others with similar passions!

Where do you currently work?

I work at the Ministry of Energy and Resources, where my role is to focus on improving a single window for oil and gas licencing. Previously I worked at Brandt, Bombardier, and General Motors in engineering and improvement roles.

What draws you to Lean/Improvement work?

I think the Respect for People aspect is what engages me the most. Involving those who know the work to improve the work. There is nothing quite like witnessing an "ah ha" moment!
