

Building Connections

Where education meets fun in the world of Snapology

Minecraft® Basic

Travel to the Nether with Snapology, but watch out for those creepers! Join us as we bring Minecraft® to life using LEGO® bricks. Create your own world that includes animals, creepers, and your very own Minecraft® character.

What the Students Will Learn

- **Fostering Creativity**

Students will have the opportunity to let their creativity run wild. Each class students will partake in an activity in which they create their own Minecraft® themed builds. They will have the ability to choose to recreate their favorites from the game or put their own twist on the well-known favorites. There is sure to be plenty of creativity as they recreate their very own Minecraft® worlds.

- **Presentation Skills**

Many school age students struggle in their presentation skills in the classroom. Snapology will help your child feel more comfortable presenting in front of a class by having the child explain each of their builds to their peers. Presenting their creations will help their confidence in front of the class and will translate into their everyday self-assurance in the classroom.

- **Teamwork/Partner Skills**

Steve would not be able to defeat the worst mobs without great teamwork. At Snapology, we highlight those same principles in our classroom. We emphasize in our classes that the students use good teamwork skills. They are required to do group planning and respect the opinions and ideas of their partners.
