

SPECIAL INVITATION

TO AN INTRODUCTORY NUTRITION RESPONSE TESTING[®] SEMINAR

ABOUT MIRANDA TAYLOR, LAC, EAMP, MTCM

Miranda Taylor graduated from Cornell University with her Bachelor of Science degree in Biology in 1993. She then earned her master's degree in acupuncture and Chinese herbal medicine with honors, from the Northwest Institute of Acupuncture and Oriental Medicine in Seattle, WA in 2003. She also completed her internship at the Chengdu Traditional Chinese Medicine Hospital in China.

Miranda was introduced to Nutrition Response Testing by her chiropractor in 2011 when she was seeking to improve her own health and was immediately intrigued. From there, she immediately enrolled in the Advanced Clinical Training program in Clearwater, Florida. She has been fully certified as a Nutrition Response Testing Clinical Master since 2014 and now owns a practice in Seattle, WA.

"Nutrition is one of the most important components in holistic health care practices today, but prescribing supplements without regular testing can be redundant or ineffective. Chinese nutritional theory works but requires some trial and error. Nutrition Response Testing has filled in many gaps in my knowledge and provides a subjective basis for better nutrition treatment plans. Nutrition has benefited my patients whose health was suffering, despite seeing medical doctors and alternative practitioners. Also Nutrition Response Testing benefits both the practice and the patients in the evaluations and treatments that are streamlined and effective."

ABOUT NUTRITION RESPONSE TESTING

Nutrition Response Testing, developed by Dr. Freddie Ulan, is a non-invasive system of analyzing the body through the autonomic nervous system to determine the underlying causes of ill health. When these are corrected through safe, natural, nutritional means, the body can repair itself in order to attain and maintain more optimum health.

BENEFITS

- Easy to learn and apply in your current practice.
- Achieve better results with fewer products.
- Identify the five key resistance factors that can help you solve the toughest cases.
- Prioritize treatment, increase patient compliance and gain reproducible results
- Enjoy a stress-free, cash component in your practice, without insurance or managed-care hassles.
