

# Architectural Interior Wall Panels

INSTANTLY TRANSFORM ANY SPACE FROM DREARY TO MODERN & CONTEMPORARY

## PRODUCT OVERVIEW

**McCain Walls® Architectural Interior Wall Panel Systems** bring to life the interior of any room through the use of decorative metal panels and patented-designed hanging rails. The versatility and flexibility of the panels give architects and interior designers the freedom to change out the look of a room as desired in a matter of minutes.

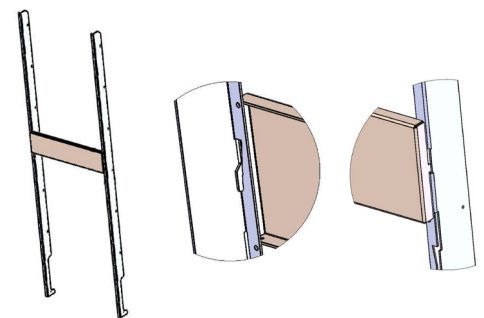

Manufactured from .090 thk aluminum, the metal panels are simple to install onto an existing *McCain Walls* system or directly onto any wall substrate (wood, drywall, brick, cement), creating a modern and contemporary space.

The prefabricated wall components arrive at the job site ready for installation. No sanding, mudding or painting required, making it the ideal dust-free solution for Hospitality, Healthcare, Corporate and Commercial applications.

Make a statement or create a focal point by selecting from our array of powder coat finishes, textures, and architectural vinyl films.

## BENEFITS

- ✓ Skin or resurface existing walls in minutes
- ✓ Install interior wall panels instantly using patented-designed hanging rail systems
- ✓ Choose from a variety of contemporary colors and textures in vinyl and powder coat finishes
- ✓ Create aesthetically pleasing interiors with sustainable interior wall panels
- ✓ Avoid visual nuisances- such as damages, scratches, wears, dirt, and stains

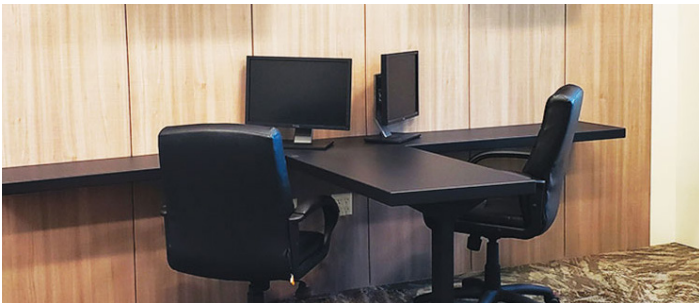

*Shown Illustration: CAD view of patented-designed concealed fastening rail system, wall panel back view, wall panel front view)*

## Why Non-Porous Metal Wall Panels?

The non-porous, non-combustible aluminum wall panels are robust and durable and can withstand dings and dents from high-traffic areas. The strong panel structure provides the following attributes:

- Impact Resistant- metal surface can't be cut into, making it much more secure than drywall or plastic
- Wear Resistant- wall finishes withstand the everyday wear and tear
- Mold and Mildew Resistant- aluminum panels and durable finishes are easy to clean
- Quick Fixes- easily repair a section of damaged vinyl or a panel without breaking down the entire system

Interior Panels with Wood Plank Architectural Textured Film

Vertical Interior Wall Panels Using Horizontal Hanging Rails

Precision Laser-Cut Custom Wall Panels

## System Configuration Options & General Specifications

### System Configuration Options

- Vertical or horizontal fastening rail system
- Architectural vinyl finish films
- Architectural interior powder coat finishes and textures
- High-precision custom decorative panel designs available
- Mix and match panel heights and widths
- Hospital-grade anti-microbial coating

### General Specifications

<b>Panels</b>	Standard heights: 96" and 120" Standard widths: 6", 12", 24" Custom sizes and shapes available.
<b>Custom Panels</b>	High-precision laser-cut decorative designs
<b>Materials</b>	.090 THK aluminum metal
<b>Finishes</b>	Architectural vinyl finish wraps, architectural interior powder coat finishes and textures
<b>Fasteners</b>	Concealed vertical and horizontal fastening rail systems
<b>Pattern Type</b>	Varies on final design and concept
<b>Standard Packaging</b>	Wrapped and stacked on wood pallets or boxed pending panel dimensions
<b>Shipping Weight</b>	Varies on the final <i>McCain Walls</i> system design
