MCALESTER STOCKYARDS, 12 NOON

OKLAHOMA BRANGUS *association*

Welcome

On behalf of the Oklahoma Brangus Association, we would like to invite you to the Spring 2024 production sale in McAlester, OK. We would like to express our gratitude to all our past customers who have invested in our programs.

We are the longest running Brangus state association sale in the United States for a reason, we have always strived to produce top genetics that our customers and industry have demanded. We have put an emphasis on our breeders to push for genetic excellence when selecting bulls and females to display for our commercial buyers. I have hand selected this year's animals which are phenotypically correct, have genomic superiority, and very functional, that when you purchase these animals rest assured that they will go to work and move the marker within your herd. Most animals have been parent verified and have genetically enhanced EPD's. We have a selection of females that are not only eye appealing but real world Brangus females that will do what the Brangus Breed is known for. Don't look past the 30 plus top of the line commercial cows and heifers being offered.

Look for supplement information sale day on bred females. We look forward to seeing you sale day and if you have any questions please contact Shiloh Hall at 918-798-1337 or by email shiloh518@yahoo.com.

Thank you,

Shiloh Hall

Sale Order and Supplements

Sale orders and supplemental information will be available on Saturday morning prior to the sale.

Announcements from the auction block regarding the cattle selling in this sale will take precedence over any printed information.

Liability

All persons attending the sale do so at their own risk, legal or otherwise, for their safety or the behavior of the animals.

videos

**Please contact individual consignors
for videos of their lots.**

The owners, sale management, and hosts assume no liability for loss or damages however so caused.

Trucking

Responsible trucking available. Trucking is the responsibility of buyer. Consignors will gladly help to make arrangements for trucking. All animals become the responsibility of new owner upon end of sale.

Payment and Delivery

Please contact Shiloh Hall (918-798-1337) immediately after the sale to arrange payment and delivery.

Genetically Enhanced EPDs

Animals with Genomic Enhanced EPDs are designated in catalog with a "GE-EPD". There are numerous interesting and educational articles written on the value and uses of Genetically Enhanced EPDs. If interested in the advancements in beef production through use of GE-EPDS you can google and find these articles very easily or there are several in past Frontline's or Brangus Journals. The short version is - Genetically Enhanced EPDs have higher EPD accuracies, and a lower possible degree of change of an animals EPDs. Through the use of DNA to produce GE-EPDS an animal with no progeny will have EPDs equal to an animal with 6 to 20 progeny varying in different EPD values. Giving young animals a much more predictable set of EPDs.

Schedule

Friday, March 22

2:00pm Cattle available for viewing

5:00pm Oklahoma Brangus Association Meeting

Saturday, March 23

8:00am Cattle available for viewing

12:00pm Oklahoma Brangus Association Sale,
McAlester Union Stockyards

Catalog Requests:  Shiloh Hall | 918-798-1337

 social media @oklahomabrangusassociation

DATA KEY

Due to the differences in management practices, weather and other conditions. Individual weights and measurements cannot be compared to animals from different farms or ranches. Animals should only be compared to animals in their own on farm contemporary groups. The use of EPDs and accuracies of EPDs is the only tool available to compare animals from herd to herd. Low accuracy animals have a much higher possible change in either direction on all EPDs than higher accuracy animals. Read information provided on this page and the previous page to better understand EPD values.

WHAT ARE EPD'S?

Expected Progeny Difference (EPDs) are the best estimate of an animal's genetic merit for a particular trait. It takes into account the animal's own performance, compared with it's contemporaries and the performance of it's relatives, compared against their contemporaries.

Birth Weight (BW) EPD predicts calf size and calving ease, if all other extenuating conditions are held the same.

Weaning Weight (WW) EPD predicts preweaning growth potential.

Yearling Weight (YW) EPD predicts overall growth potential.

Milk EPD predicts the maternal contribution to weaning weight of the calf, through milk production, behavior, immunity and other maternal environmental factors.

Total Maternal (TM), also called M&G EPD predicts weaning weight of calves from a bull's daughters.

Scrotal Circumference (SC) EPD predicts testicular size at puberty.

ULTRASOUND EPDs

Ribeye Area (REA) EPD predicts total muscle

Intramuscular Fat (IMF) EPD predicts % of intramuscular fat which is highly correlated to marbling.

Rib Fat Thickness (FT) EPD predicts external fat thickness.

**REA and FT are primary components of USDA Yield Grade, and marbling is the primary component of USDA Quality Grade.*

PERFORMANCE

Individual performance data is provided as supplementary information as EPDs provide more reliable evaluation of genetic differences of animals.

Actual Birth Weight (BW) are reported from the producer.

Weaning Weight (WW) are adjusted to 205 days.

Yearling Weight (YW) are adjusted to 365 days.

Scrotal Circumference (SC) are adjusted to 365 days.

Average Daily Gain (ADG) is a measure of growth rate on a high energy diet. It is positively associated with feed efficiency.

Ribeye Areas (REA) are adjusted to 365 days and ratioed relative to contemporaries.

Intramuscular Fats (IMF) are adjusted to 365 days and ratioed relative to contemporaries. IMF is highly correlated to marbling.

Fat Thickness (FT) is adjusted to 365 days and ratioed relative to contemporaries.

Heifer Preg: The Heifer Pregnancy EPD predicts the probability that an animal's offspring will breed and have a calf as a two-year-old.

STAY: The Stayability EPD predicts the likelihood an animal's daughters will still be in the herd at six years old versus the average of the breed.

Cow Weight: The Mature Cow Weight EPD is a prediction of how much an animal's daughters will weigh as a five-year-old versus the average of the breed.

Terminal Index: The terminal index combines birth weight, weaning weight, milk production, post wean gain, ribeye area, marbling, and back fat EPDs into a single number. The index is expressed as s standard deviation from the breed average, meaning that bulls with a +2 index are two standard deviations above the average. Higher numbers are superior to low numbers.

Fertility Index: Fertility selection index is an index that combines heifer pregnancy, stayability, the age a cow will first calve, mature cow weight, and back fat EPDs into a single number. The index is expressed as s standard deviation from the breed average, meaning that bulls with a +2 index are two standard deviations above the average. Higher numbers are superior to low numbers.

Brangus EPDs are calculated by the Livestock Genetic Serves and are part of a program called the National Cattle Evaluation (NCE).

We think that 315/19D is a very nice, well balanced young female. She has great profile and a very nice underline. Her dam is one of our best producers MS Champ 315/6A and her sire is our herd sire Back in Black. Very docile and she will be an easy keeper. She is bred to our herd sire MR Kryptonite 485/22. His birth weight was 65 lbs. Her ECD is September, 2024.

Commercial Females

45-54 GORCZYCA

If looking for replacements females here is a set we hate to part with but must due to space. Females all raised at same farm, very docile, each branded for individual ID and are current on all vaccinations. Theses are open and ready to bred to bull of your choice. Videos available upon request.

55-64 DICKEY

A set of hand picked heifers suitable for replacement in anyone's herd from a ranch raising commercial and registered Brangus cattle for over 20 years. They are from a really good Main Event sire or a former AI sire in the breed. These heifers are being developed on crabgrass hay and 4 lb of mixed commodity daily so they will be in really good condition but not fat. Most are February born and will be ready to breed in May. Should weigh 800 by then. Expect them to be moderate framed with good feet and utters and calm dispositions and a mature weight around 1400 lbs.

65-74 WELLS

Home grown set of open yearling to yearling plus heifers that are ready to bred this spring. They are docile and up to date on shots.

Terms & Conditions

Except for those stated in the terms and conditions below, there are no warranties either expressed or implied, as to the merchantability or fitness for a particular purpose with respect to the cattle being sold at this auction.

The warranties and guarantees set forth in the "Terms & Conditions" are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any party through buyer, for any breach of warranty or guarantee therein provided, and all other obligations or liabilities.

1. BIDDING - Each animal will be sold to the highest bidder. The auctioneer in charge will settle any disputes as to bids and his decision will be final.

2. TERMS - Terms of the sale are cash or check. Settlement must be made to the clerk at the conclusion of the auction.

3. PURCHASER'S RISK - Each animal becomes the risk of the purchaser as soon as sold by the auctioneer, and the risk of loss will pass to purchaser at the time of sale by the auctioneer; but animals will not be delivered until settlement has been made. After the sale, animals must be taken promptly by the purchaser, but in any event must be removed from the seller's premises within three (3) days of the auction. After three (3) days, a reasonable charge for boarding will be made by seller to purchaser.

4. CERTIFICATE OF REGISTRY - When full settlement has been made, a Certificate of Registration will be furnished and transferred to the purchaser. Give full name and address to the clerk when making payment so the Certificate of Registration will be transferred properly.

5. HEALTH - Oklahoma is Brucellosis (Bangs) and Tuberculosis- free state. An interstate health certificate will be furnished in accordance with Federal Regulations and the state of Oklahoma.

6. ANNOUNCEMENTS - Announcements from the auction box will take precedence over the printed matter in this catalog. All cattle will be sold by lot numbers as announced by the auctioneer.

7. MAIL BIDS - Phone, mail or email bids may be furnished in confidential form to either Wes Dotson, Auctioneer or Shiloh Hall, OBA Sales VP.

8. BREEDING GUARANTEE - (A) All animals are guaranteed to be breeders with the exception: (1) injury or disease occurring after the sale; (2) negligence or willful mistreatment of the part of the purchaser. (B) Any female is considered a breeder is she is pregnant at the time of the sale and/or she has a calf at side. (C) Any bull shall be considered a breeder that produces viable semen.

9. OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT FOR BULLS - (A) All claims for adjustment or return must be made in writing within six months of the sale. (B) If any animal guaranteed to be a breeder that has not proven itself a breeder within the time limit specified above, if in healthy condition and weighing within 80% of sale day weight, may be returned to the seller at the purchaser's expense. The seller reserves the right and privilege of trying for a period of six months to prove the animal a breeder. If proven a breeder, the animal will be returned to the buyer, at buyer's expense. Should the animal fail to breed, the buyer may receive replacement of the animal with an animal of equal value. (C) Any animal returned must have a veterinarian's certificate that it is healthy and free of Bangs and Tuberculosis.

10. OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT FOR FEMALES - (A) All claims for adjustment or return must be made in writing within six months of the sale or no later than six months after the animal reaches 18 months of age. (B) If any animal guaranteed to be a breeder that has not proven itself a breeder within the time limit specified above, if in healthy condition, may be returned to the seller at the purchaser's expense. The seller reserves the right and privilege of trying for a period of six months to prove the animal a breeder. If proven a breeder, the animal will be returned to the buyer, at buyer's expense. Should the animal fail to breed, the buyer may receive replacement of the animal or pair with an animal or pair of equal value. In case a cow sold with a calf at side is returned because the cow is determined a non-breeder, the calf must also be returned. (C) Any animal returned must have a veterinarian's certificate that it is healthy and free of Bangs and Tuberculosis.

11. RIGHT AND OBLIGATIONS - (A) The preceding terms and conditions of sale shall constitute a contract between the purchaser and seller of each animal and shall be equally binding upon both. (B) Animals resold following purchase in this sale shall constitute a separate transaction, and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale. (C) All persons who attend the sale do so at their own risk and neither the owners, nor any person connected with the management of the sale facility assume any liability, legal or otherwise, for any accidents which may occur. 12. GOVERNING LAW - All cattle offered for sale according to the laws of the state of Oklahoma.
