# MY BIOME PROJECT

**Purpose:** This project is to prepare you for your group biomes project we will be beginning this week. You will need to get used to describing every detail of your biome, and being able to explain it to an audience. So lets practice!

**Directions:**

1. Pick your favorite place in the whole wide world. Describe it to me in 2-3 sentences.	
2. List at least three animals or critters you would find in this location	
3. List at least three different plants you would find in this location.	
4. Tell me about the weather. What is it like daily? What is it like annually? (How many seasons)	
5. Describe at least 4 symbiotic relationships you would see in your biome

# MY BIOME PROJECT

Draw me an energy pyramid beginning with the type of producers you would find in your biome at the bottom of the pyramid

Draw me a VERY detailed picture of your biome, labeling EVERYTHING you described on the previous page.
