

Fabrication/Shop Manager

Gate Pros Inc. is searching for an experienced, trustworthy, hardworking fabrication manager for our shop located in Wauchula, FL. Our shop builds and designs aluminum gates, railings, stairs, handrails, and everything in-between. Applicant must have experience in all aspects of fabrication, as well as the ability to manage a facility and its employees. Knowledge of automated gates is preferred. Competitive pay ranging from \$27-\$35/hr depending on experience. Applicant MUST provide a detailed resume with references. **Please E-mail resumes and contact information to cknight@gate-pros.com.**

Fabrication Manager Required Skills:

- **Fabrication Department**
 - Manage the fabrication facility, employee development, and standardize procedures
 - Able to coordinate and manage all aspects of operations and productivity
 - Review and enforce discipline amongst other employees in a professional and respectful manner
 - Supervise and overlook all ongoing projects on a day-to-day basis of four (4) fabrication employees
 - Responsible for managing inventory, purchasing raw materials, and ensuring stock levels are met each week
 - Problem solving of every aspect; fabrication, electrical, plumbing etc.
- **Continuous Improvement**
 - Identify problems within production and propose a solution to avoid future complications
 - Provide innovative ideas to improve production and efficiency to enhance the overall quality of our company
- **Safety Procedures**
 - Ensure employees are completing tasks in a safe and efficient manner
 - Able to implement standardized safety procedures
 - Capable of training employees how to properly operate equipment within the fabrication shop
- **Blueprints**
 - Able to read, scale, visualize and draw in 2-Dimensional and 3-Dimensional planes
 - Familiar with Commercial and Residential building codes
 - Ability to analyze blueprints thoroughly and identify any problems that could potentially result in issues during production
- **Quality Standards**
 - Meet specified standards to ensure high quality products are being delivered to customers
 - Ensure minimal drop/waste while cutting materials
 - Incorporate new standards that will provide the company with higher quality products
- **CNC Equipment**
 - Familiar with CNC press break, CNC plasma table
- **Equipment**
 - Experience using a drill press, lathe, milling machines, band saws, table saws, etc., as well as the ability to perform simple repairs
 - Experience welding aluminum and using a cutting torch during fabrication
- **Production Schedules**
 - Ensuring fabrication is being completed in a timely and efficient manner
 - Coordinating with others to establish a start-to-finish production timeline
- **CAD**
 - Experience using and understanding various CAD programs
 - Fusion 360, Auto CAD, Solid Works
 - Ability to operate and maintain CNC plasma cutting associated with CAD programming
