Health, Safety & Environment

The CAW Health, Safety & Environment department fights for better laws and information on substances found in the workplace.

This office also helps local unions set up programs to eliminate hazardous conditions in the workplace and assists local union discussion leaders and national representatives to conduct health and safety training programs.

The department publishes a [CAW Health and Safety & Environment Newsletter](#), which is released bi-monthly.

For more information on the Health, Safety, Environment & Workers Compensation follow the links below, or email us at: cawhse@caw.ca. For additional resources click [here](#).
