TRUCKER TAX SERVICE

Driver Retention

Are you the best company to work for . . . prove It

The Basic Plan

This is the easiest to use smart-phone app in your industry. It allows the driver to track nightly logs and enter location information manually or enable GPS to minimize the effort.

The Elite Plan

Driver know they are losing money by not tracking all their deductions. This app plan makes it easy to enter items and the software automatically enters items into the correct categories for the driver's convenience at tax time. At a glance, the drive can track income, profit, reports, all in a customizable dashboard.

Additionally, the driver gets receipt tracking, an expanded dashboard, automated financial alerts, plus access to an accounting professional. Go to www.profithauler.com for more information.

America is facing a shortage of drivers. You know this because your annual turnover is over 100%. Drivers can leave you on a whim and they do. And, with the new mandate requiring commercial vehicles to have an electronic logging device sometime in 2015, drivers are going to need to know how to be profitable over multiple trips.

Trucker Tax Service (TTS) can help you retain drivers and educate them all at the same time. TTS can provide seminars to help them understand their taxes and how to be profitable. We also can recommend easy to use technology to help prove they are getting the best deal from you.

Technology can give drivers an immediate look at their profit per mile on one trip or multiple ones. It tracks income, expense, and provides profit statements, all of which, in real time. All from a smart phone.

So call us to discuss in detail how TTS can help you retain drivers.
