Let Experience be Your Guide

SENIOR NEURODIAGNOSTIC TECHNOLOGISTS – SAN FRANCISCO, CALIFORNIA

WEBCO HR, Inc. is seeking a Neurodiagnostic Technologists for one of our clients located in San Francisco, California.

SUMMARY:

Are client is hiring ND talent for those interested in being a part of a high functioning team. Their Program allows new graduates as well as experienced technologists to gain knowledge, skill development, and experience with a career ladder for advancement. They are embarking on many new adventures in expansion of our Neurodiagnostics Program.

RESPONSIBILITIES:

The Neurodiagnostic Technologist, under direction from the Manager will participate as an integral member of the Neurodiagnostic Services by performing routine and complex EEGs, Video EEG in the Epilepsy Monitoring Unit, Long Term (EEG) monitoring, Evoked Potentials (EPs) and other specialized procedures in both inpatient and outpatient settings, including nursing floors, intensive care units, operating room and other specialized locations. These tests record the electrical activity in the brain and nervous system. The Neurodiagnostic Technologist will ensure electrode and technical integrity and quality of all Neurodiagnostic procedures performed. Accurate results provide the physician with valuable information to diagnose and treat neurological conditions/disorders such as headaches, seizures, strokes, and degenerative brain disease. The Neurodiagnostic Technologist may participate in departmental and organizational programs, including performance improvement activities, in-services and staff development activities.

All positions offer a 4/10 schedule and there are no on-call hours! Their Parnassus location shift is 9pm-7:30 am and 11am to 9pm; Their Mission Bay location shift is 11am to 9:30pm. They offer a very competitive and comprehensive benefits package including a pension plan effective on the first day of employment!

REQUIREMENTS:

- Registered in one or more modalities. EEG and/or Evoked Potential Technologist (R. EEGT./R. EPT.), CLTM, CNIM.
- Graduate from an accredited training program in Neurodiagnostics is highly preferred.
- At least two years of experience as an EEG Technologist.
- Demonstrated competency in performing complex EEG's as well as in one or modalities such as EP, LTM, EMU etc.
- At least two years' experience in an acute care hospital setting.
- Demonstrates ability to be an independent, motivated self-starter

- This position requires the flexibility to orient and work at all UCSF Health locations.
