

### Pirate Fest, Family Day!

June 23rd, 2018

Although having been pushed back a day due to inclement weather, the Lockhouse Museum's Pirate Fest was a huge success! The Maritime Museum and Environmental Center had a booth where they promoted reusing household materials as crafts. Titled "Build a Boat Workshop", the kids created small pirate ships out of corks, rubber bands, toothpicks and paper! Well over 300 ships were made!!! We even had a small water tub where the kids sailed their ships!! The Environmental Center is thrilled when there are opportunities for outreach and education. The team promoted 2019 summer camps and environmental workshops, which they hope to start Fall 2018!
