RE: Reference for Allen Fuller

To whomever it may concern,

I have worked with Allen Fuller for approximately 10 years on both Military Department of Defense and Private Sector projects, both Medical and Non-Medical projects, and can attest to his skill and knowledge in writing, editing, and even more importantly organizing and understanding of specifications. He is adept at various specification platforms including Specsintact, Masterspec and VA Specifications. Allen is a skilled communicator and can work with his clients to the level and degree they desire. His organizational skills ensure a complete and accurate project specification. Allen also takes the time and care to review the Description of Materials in our project drawings to ensure they are coordinated with and compliment the specifications.

Allen has been a pleasure to work with over the years and I have come to rely on his knowledge of construction and materials. He works well with our project teams and is skilled at listening to our issues in order to solve any problems which may arise. He has been an invaluable help to me in my management of projects and would highly recommend him to guide your specification process, whether it be from its inception or as a review or quality control procedure.

Sincerely

Timothy A. Williams, AIA LEED AP
Project Manager
