

Miramar Landing, Do You Know?

Controlling your Lighting

Did you know that you can control your outside lighting with an easy installable switch or timer? There are lots of brands and styles, but here are three types that may work for you.

1. **Digital Hardwired Timers** will give you full programmable control. They require some technical handyman skills or professional installer. They cost between \$19- \$45 and are available in a 3-way switch. (more details below)
2. **AutoChron Wireless Wall Switches** will give you full programmable control. They require little to no handyman skills and are easy to use. They cost between \$10 - \$25. (more details below)
3. **Dust to Dawn Light Control** will turn on and off automatically from dust to dawn. They require little to no handyman skills and most require no programming. They cost between \$7-\$12. (more details below)

If you have any questions, feel free to contact your Miramar Landing Watch member, so we can light up our community together.

Miramar Landing, Do You Know?

Make any wall switch automatic with the versatile AutoChron wireless timer. Now you can control your overhead lights or outdoor lights automatically from a toggle wall switch with no need for rewiring. The AutoChron is fully programmable - you can set it to turn lights off at the same time each day, different times or different days - or even different times on the same day. The AutoChron lets you vary on/off times so that anyone watching your house can tell whether you're home or away. You don't get that security with any manual timer. Just as important, the AutoChron doesn't "plug into" your devices directly so even if there is a power outage, the AutoChron won't lose its power and will continue to operate as you set it when the power comes back on. Conventional manual timers stop working when there is a power outage so the "on/off" times are lost. The AutoChron installs easily over any toggle wall switch cover. You can put an AutoChron in every room where there is a wall switch and
