**April 28, 2020 Morse Dental Lab Operating Update:**

- 1. Per Gov. DeWine (OH): Dental operations can resume effective May 1, 2020. MDL will be operational to service our existing dental partners at that time.**
- 2. MDL is currently not scheduling same day repairs/relines/etc. These services are available as overnight returns to our local dental partners. We will update our partners when this policy changes.**
- 3. Due to the scheduling changes that our dental partners are relaying to us, we ask that you please call to schedule pickup/delivery service. If your office has an altered schedule, please reach out and let us know.**

**Morse Dental Lab can be reached via:**

**Email:** [pmorse@morsedentallab.com](mailto:pmorse@morsedentallab.com) or [kday@morsedentallab.com](mailto:kday@morsedentallab.com)

**Telephone:** 888-738-0715 or locally at 440-639-1078

**Website:** [www.morsedentallab.com](http://www.morsedentallab.com)

- Morse Dental Lab is a Nationally Certified Dental Lab. From the National Board of Certification: Dental Laboratory: This designation requires stringent infection control and case management standards with a requirement of having at least one Certified Dental Technician employed at the laboratory. This means that we have qualified and maintained an environment that meets or exceeds national standards for our own protection and the protection of our dental partners.
- For the protection of our staff and yours, it is essential to disinfect all items both incoming to and outgoing from your office. All tools, equipment and handling areas within Morse Dental Lab are disinfected multiple times daily. We do recommend that all lab products, received from any dental lab, should be sterilized prior to placement.
- If you are one of our out-of-state dental partners, please practice essential disinfection safety when packaging casework. You are welcome to ship casework to Morse Dental Lab and we will work our hardest to maintain the usual lab timelines that your office has come to expect until the Ohio Guidelines initiate a suspension. Communication will become essential during these times and please know that you can reach the lab either by emailing [pmorse@morsedentallab.com](mailto:pmorse@morsedentallab.com) or by calling 888-738-0715 to check on casework.

**Thank you and please stay in communication.**
