SLENDERIZED INTEGRATION OF
NAVIGATION AND AUTOMATION
MODULARITY IN A MONOLITHIC AND LIGHT DESIGN
A SMALL, BUT SMART SPACE FOR MANAGING THE ENTIRE SHIP.

The powerful Böning ship automation system connects to almost any system and sensory device on board. With the integrated ECDIS software the skipper gets an overall solution at a central point. Irreplaceable external devices like VHF, autopilot, weather fax or any else can be concealed under the console. Control of all systems is performed by touch screen or customized operation panels.
Headquarters in Ganderkesee, Germany
Branches in the U.S.A., Brazil, Italy, Spain, and Croatia
